

114TH CONGRESS
2D SESSION

S. 2572

To make demonstration grants to eligible local educational agencies or consortia of eligible local educational agencies for the purpose of increasing the numbers of school nurses in public elementary schools and secondary schools.

IN THE SENATE OF THE UNITED STATES

FEBRUARY 24, 2016

Mr. TESTER (for himself, Ms. STABENOW, Mr. REED, and Mr. PETERS) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To make demonstration grants to eligible local educational agencies or consortia of eligible local educational agencies for the purpose of increasing the numbers of school nurses in public elementary schools and secondary schools.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Nurses for Under-
5 Resourced Schools Everywhere Act” or the “NURSE
6 Act”.

1 **SEC. 2. FINDINGS.**

2 Congress finds the following:

3 (1) The National Association of School Nurses
4 identifies schools as primary locations to address
5 student health issues, since a school nurse is the
6 health care provider that many students see on the
7 most regular basis.

8 (2) The American Academy of Pediatrics em-
9 phasizes the crucial role of school nurses in the
10 seamless provision of comprehensive health services
11 to children and youth, as well as in the development
12 of a coordinated school health program.

13 (3) The school nurse functions as a leader and
14 the coordinator of the school health services team,
15 facilitating access to a medical home for each child
16 and supporting academic achievement.

17 (4) School nurses promote wellness and disease
18 prevention to improve health outcomes for our Na-
19 tion's children. In addition, school nurses perform
20 early intervention services such as periodic assess-
21 ments for vision, hearing, and dental problems, in an
22 effort to remove barriers to learning.

23 (5) The American Federation of Teachers has
24 called for a nurse in every school, as nurses are
25 front-line workers that address an array of health

1 needs and their presence in a school can help to im-
2 prove student learning.

3 (6) National data indicate only 45 percent of
4 public schools have a school nurse all day, every day,
5 while another 30 percent of schools have a school
6 nurse who only works part-time in one or more
7 schools.

8 (7) The National Association of School Nurses
9 has reported that medication administration to stu-
10 dents is one of the most common health-related ac-
11 tivities performed in school. As more chronically ill
12 and medically unstable children enter the school sys-
13 tem each year, the medical factors that promote and
14 support their academic success increase, including
15 the need for medications that enhance overall health
16 or stabilize chronic conditions.

17 (8) Statistics from the National Center for
18 Education Statistics indicate that 15 to 18 percent
19 of the 52,000,000 students who currently spend
20 their day in school have a chronic health condition.

21 (9) According to the American Academy of Pe-
22 diiatrics, students today face increased social and
23 emotional issues, which enhance the need for preven-
24 tive services and interventions for acute and chronic
25 health issues. School nurses are actively engaged

1 members of school-based mental health teams and
2 spend nearly 32 percent of their time providing men-
3 tal health services, including universal and targeted
4 interventions, screenings to identify early warning
5 signs and provide referrals to medical providers, and
6 crisis planning.

7 (10) In 2013, the Bureau of the Census re-
8 ported 7.6 percent of children under the age of 19,
9 which equals 78,000,000 children under the age of
10 19, were without health insurance. Data show that
11 uninsured children achieve lower educational out-
12 comes than those with health coverage. Children who
13 cannot afford to see a medical provider miss more
14 days of school, experience increased severity of ill-
15 ness, and suffer from disparities in health.

16 (11) More than 1,600,000 children experience
17 homelessness each year in the United States. Home-
18 less children develop increased rates of acute and
19 chronic health conditions, and the stress of their liv-
20 ing situation can negatively affect their development
21 and ability to learn. As a result, schools have become
22 the primary access to health care for many children
23 and adolescents. School nurses serve on the front
24 lines as a safety net for the Nation's most vulnerable
25 children.

(13) A 2011 study showed that a school nurse in the building saves principals, teachers, and clerical staff a considerable amount of time that they would have spent addressing health concerns of students, including saving principals almost an hour a day, saving teachers almost 20 minutes a day, and saving clerical staff more than 45 minutes a day. This would amount to a savings of about 13 hours per day in the aggregate for such school personnel.
